A trader can use this information to learn if companies & institutions including others businesses are investing plus using block chain technology etc.

## 2). Coin Articles

Various relevant coin articles from a range of media channels & Crypto news magazines

## 3). Coin Categories

Lists all coin categories with market data showing name, details, market cap and 24 hour volume.

## 4). Coin Exchange Rates

Coin names, types, symbols and exchange rates relative to the current Bitcoin price.

## 5). Fear & Greed Index's

The fear & greed index dials show current daily, weekly and one year sentiment giving a judgment on whether to make long term investments or short term trades.

What emotion is driving the market now? The Fear and Greed Index is a rating of 0 - 100 indicating what are driving the market investors.

The quick glance dials show trading and market sentiment along with a 365 day or 1 year history of fear & greed indexes.

The crypto market behaviour is very emotional. People tend to get greedy when the market is rising which results in FOMO (Fear of missing out). Also, people often sell their coins in irrational reaction of seeing red numbers.

- Extreme fear can be a sign that investors are too worried. That could be a buying opportunity.
- Extreme greed is when investors are getting too greedy, that means the market is due for a correction.

The current sentiment of the Bitcoin market and crunch numbers are put into a simple meter from 0 to 100. Zero means "Extreme Fear", while 100 means "Extreme Greed".

Social Sentiment Scoring

The Galaxy Score $^{TM}$ is a combined measure of cryptocurrency indicators used to correlate and understand the overall health, quality and performance of a specific project. In short, it indicates how well a coin is doing. The Galaxy Score can also be used as a signal when a project is entering a new territory, from very positive to very negative.

The overall score combines the total score of four key performance indicators:-

  1). Price Score - A score derived from a moving average that gives the coin an indication of upward or downward trend based solely on the market value.

  2). Social Sentiment - A percentage-based score of the overall bullishness or bearishness of all collected social posts.

  3). Social Impact - A score of the volume/interaction/impact of social to give a sense of the size of the market or awareness of the coin.

  4). Correlation Rank - The algorithm that determines the correlation of social data to the coin price/volume.

ALTRank™ is designed to access a cryptocurrency's community and traction and compare that across the entire cryptocurrency marketplace.

**AltRank$^{TM}$** is made up of the following metrics:-

  1). Market Volume Rank - A measure of a currency's market volume based on validated exchange volume

  2). Social Volume Rank - A measure of the unique volume across all our data sources

  3). Percent Change versus Bitcoin Rank - A measure of a currency's performance against Bitcoin

  4). Social Score Rank - A measure of the total volume across all our data sources

Put directly, if a cryptocurrency is consistently ranking in the top 25, you should be paying attention.
